EXPERIENCE

Temple and Webster (Diversify OOS)

Position: Full-Stack Engineer

Location: Sydney, Australia

Duration: JANUARY 25, 2021 - PRESENT

Temple and Webster's product is an online store that sells, home, kitchen, and office tools and furnitures, more like an IKEA but online, the company is based in Sydney Australia, I work for them remotely with the help of Diversify offshore staffing solutions.

I handle the development, implementation, management, optimization, and continuous improvement of their e-commerce website.

As a team, we also have a strong process and currently using scrum.

Skills: PHP, JavaScript, Scrum, jQuery, CSS, Linux, HTML, Kanban, Apache, Microsoft SQL Server, Extreme Programming, Backbone.js, Git, Web Development

HungryHungry (Microsourcing)

Position: PHP Developer

Location: Melbourne, Australia

Duration: MAY 15, 2017 - JANUARY 22, 2021

Hungryhungry is an online ordering system provider for restaurants in Australia, they have 500+ active clients currently, building an e-commerce website using their web application product with custom CMS called "hungryhungry admin" as one of their services, they also include a tablet application POS system called "HH Hub" where the customers manage online orders. I work for them remotely with the help of MicroSourcing Inc.

My role as a PHP Developer is to develop, implement, manage, optimize and continuous improvement of the Hungryhungry admin, it's a full-stack development using back-end and front-end skills, I also do API development for the "HH Hub", I also do DevOps work but not limited to AWS EC2, RDS, and Cloud formation configuration, and linux.

Skills: PHP, ReactJS, MySQL, JavaScript, Scrum, jQuery, CSS, Linux, HTML, Kanban, Apache, Drupal, Google Tag Manager, Extreme Programming, Git, Web Development, Datadog, Amazon Web Services (AWS)

IBM Solutions Delivery Inc.

Position: Web Applications Developer

Location: Quezon City, Philippines

Duration: SEPT 2015 - APR 2017

IBM has a subsidiary company called "IBM Solutions Delivery Inc." one of their projects is called Project "Donald" where their client is ABS-CBN one of the famous TV network in the Philippines, I was originally an employee of ABC-CBN and I was transitioned to IBM.

With my role as an Applications Developer, I develop promotional websites from scratch one example is that if they have a movie that they are currently promoting or an album from one of their artists, I was also the sole developer for SkyCable's website which is the number one Cable and broadband provider in the Philippines.

Skills: PHP, MySQL, JavaScript, jQuery, CSS, HTML, Apache, Git, Web Development, CakePHP

EDUCATION

FEU - Institute of Technology (formerly: FEU - East Asia College), Manila – *BS Computer Science Major in Software Engineering*

MAY 2010 - APRIL 2014, Nicanor Reyes St., Sampaloc, Manila, Philippines

Accomplishments and applications developed:

- **Kaidoku: Japanese character image recognizer and translator Android mobile application**

An image processing mobile app that uses Tesseract Optical Character Recognition to recognize Japanese character from a raw image, convert it into a text data and translate the recognized text into English as my latest project.

- **Health Buff Assistant: health and fitness Android mobile application**

Developed using Android Development Tools as a thesis project by doing basic research, which improved my skills and techniques in Android and Java programming and in project managing
